

MAIN FACTORS OF DEFORESTATION IN KAREN STATE:

Commercial logging (both official and illegal), the ongoing civil war; land confiscation by the SPDC to use for their military camps and for commercial monoculture plantations; routine setting of forest fires by SPDC troops to flush out opposition soldiers; large scale migration and encroachment of the non-local poor into the forestland; charcoal/firewood production business to supply the needs of urban people; clearance of land to develop infrastructure (i.e. dams, roads, gas pipelines, etc.) are undeniably major factors.
